

Climate Intelligence to understand, report and, mitigate your climate risk and hazards

Investor Deck Q1 2025

TSXV: AISX | OTCQB: AISXF | FSE: QT7

VISION

To be the very best at empowering decision-makers with precise climate insights.

MISSION

Our physical climate risk company exists to enable organizations in understanding and managing the risks associated with climate change.

The Problem

Climate Risks Are Escalating

- Extreme weather events (wildfires, floods, hurricanes) are increasing in frequency and severity.
- \$320B+* in global economic losses from climate disasters in 2024 alone.
- Businesses, governments, and insurers face rising financial and operational risks.

Lack of Actionable Climate Risk Data

- Traditional models are outdated, fragmented, and lack predictive accuracy.
- Most organizations struggle to quantify risk exposure at an asset level.
- Insurers, investors, and regulators now require climate risk disclosures, but reliable data is scarce.

Management Team and Board of Directors

Mihalis Belantis

Chief Executive Officer

Mihalis Belantis leverages deep expertise in venture capital, startup funding, and capital markets. His leadership is marked by strategic foresight and a history of guiding startups to successful exits. His visionary approach and commitment to operational excellence fuel AISIX's continuous evolution and success in an evolving landscape.

Dr. Gioachino Roberti

Head of Product

Dr. Gioachino Roberti, PhD in Geosciences, is an esteemed figure in geoscientific research. His expertise in risk assessment drives the creation of groundbreaking solutions for climate challenges.

Chris Lambert

Chief Technology Officer

Mr. Lambert is a highly regarded technology leader known for his expertise in scaling product development teams and driving innovation in the tech industry. With a strong background in software development and leadership, he has contributed to the development and expansion of various technology platforms.

Dr. Erik Young

Sr. Climate Data Scientist

Dr. Erik Young, PhD in Glaciology, excels in crafting climate data models. With extensive experience, he pioneers the development of datasets crucial for climate risk analysis, enhancing strategic decisions.

Edward Olson

Director

Edward is a Partner and National Lead of MNP's Climate Risk and Adaptation practice, with over 26 years of experience in public practice and industry. He specializes in helping clients identify, measure, and manage material climate-related topics, advancing innovative solutions. Edward also leads national services addressing global supply chain transparency and sustainability, driving value-driven climate solutions.

Advisors

Dr. David Poole

Advisor | Co-Founder

Dr. David Poole, an esteemed AI researcher, is recognized for advancing automated reasoning and complex decision-making. With over 130 research publications and an award-winning AI textbook, he's celebrated with the CAIAC Lifetime Achievement Award. As a UBC professor, Poole shapes the future of AI and contributes to climate risk management at AISIX.

Ben Mulroney

Advisor

Ben Mulroney is one of Canada's top TV and radio hosts, known for Etalk, Your Morning, and Canadian Idol. A seasoned interviewer and emcee, he brings charisma and warmth to every event. With degrees from Duke and Laval, Mulroney now advises startups and supports charities like SickKids and Cystic Fibrosis Canada, alongside his work with Aurora Strategy Global.
